

Shattered Protocols User Document

I. Introduction

- **Product Overview:** Shattered Protocols is a text-based computer science puzzle game where the user must traverse rooms, solve puzzles, find the key and solve the last puzzle to win the game.
- **Key Features:** The command prompt is the primary way of traversal and puzzle solving.
- **System Requirements:** This standalone executable is playable on Windows x64 PC
- **GitHub link:** <https://github.com/TKayaFox/Shattered-Protocols-Text-RPG/tree/Development>

II. Getting Started

- **Initial Setup:** Once executable is loaded, simply type in the terminal to play the game. To type in a keyword, insert command into terminal and press the enter/return to submit. Type *help* and the enter/return key to see lists of possible keyword commands.

III. Core Functionality

- **Feature 1, Traversal Keywords:**
 - **Ex: keyword/alternate keyword: description**
 - north/up: Takes user to room above
 - south/down: Takes user to room below
 - east/right: Takes user to room to right
 - west/left: Takes user to room to left
- **Feature 2, Item usage (the key)**
 - take: Gets item in room and puts in inventory
 - use [item name]: Uses item from inventory in current room
 - inventory: Lets user see inventory
- **Feature 3, Interaction:**
 - Read prompts on screen and utilize contextual clues/hints to develop solutions to the on-screen puzzles
 - The user has infinite tries to every puzzle, so try anything and everything to solve the puzzles
- **Feature 4, Closing the Game:**
 - exit: Quits the game

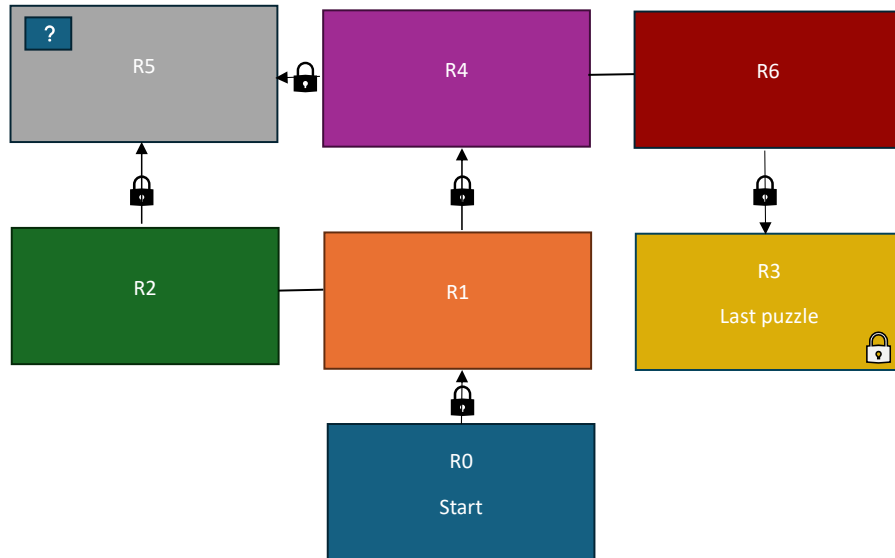

IV. Troubleshooting

- **Common Error:** Making sure your Windows Machine is x64 and not x86 (32-bit)
- **Troubleshooting Steps:**
 - Go to Settings -> About
 - Under “System Type”, ensure it says “64-bit operating system, x64-based processor”
- **Common Error:** Windows is not up to date
- **Troubleshooting Steps:**
 - Go to Setting -> Windows Update
 - See if there are any updates available on your machine

- **Common Error:** Antivirus is blocking application
- **Troubleshooting Steps:**
 - Go to your antivirus settings
 - Check to see if it has blocked any application recently
 - Allow Shattered Protocols.exe as an exception
- **Common Error:** Game may not pop on screen if files are not unzipped properly
- **Troubleshooting Steps:**
 - In the Shattered Protocols GitHub, click the green “Code” button
 - Click “Download Zip”
 - In File Explorer, right click downloaded file
 - Click “Extract all”
 - Choose where to extract the file
 - Navigate to the Game Executable file -> Windows x64 Executable and run Shattered Protocols.exe from there
